Coverco Buildings Ltd.	

The proposal evaluations were completed by March 6, 2022 by the following individual.

Nigel Gamester, Procurement Manager – Canoe Procurement Group of Canada

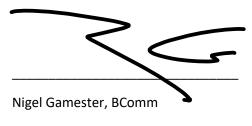

Per the Fabric & Pre-Engineered Steel Buildings with Related Accessories, Supplies, and Services Request for Proposal (RFP) documentation, proponent proposals were evaluated in two stages; the first stage is the pass / fail evaluation of all mandatory requirements, and second stage is the assignment of material points based on the rated elements / pricing elements of the proponent's proposal. There is a minimum score of 65% required to pass the second stage of evaluation.

The proposal evaluation committee used the evaluation criteria outlined in section 4.2 – Review of Mandatory Requirements and determined that all six proposal responses passed the mandatory requirements and were further evaluated according to section 4.3 – Evaluation of Rated Elements that scored each criteria with the content proposed in each proponent proposal.

Coverco Buildings Ltd. scored a total of 916 points resulting from a complete submission that addressed all material topics outlined in the RFP with excellence and credibility. The corporate overview and proponent experience with MASH sector clients were notable strengths of the proposal. Also, the range of products offered, and proposed program pricing received total points from a proposal that offered everything that was defined within the scope of the RFP with material and labour discounts ranging from 5%-14%. The marketing strategy involves many key elements such as attending Canoe events and digital marketing, however the most notable improvement required is the degree of relationship-based selling that this proponent allocates towards business development. The Coverco Buildings proposal offered serviceability in British Columbia, Alberta, Saskatchewan, and Manitoba.

The administrative fee of 4% proposed remains consistent from the previously awarded contract.

Based on the complete RFP evaluation methodology summarized in this report and the proponent scoring of 91.6%, I am making the recommendation to offer Coverco Buildings with a contract award.
