The foregoing shall not supersede the terms of any purchase agreement which provide otherwise.

7.4 Equitable Relief

Each Party acknowledges and agrees that, in the event of any breach or anticipated breach of the provisions of this Agreement relating to Confidential Information or privacy, damages alone would not be an adequate remedy, and agree that the non-breaching Party shall be entitled to equitable relief in respect of that breach, such as an injunction, in addition to or in lieu of damages and without being required to prove that it has suffered or is likely to suffer damages.

We understand that public entities often have access to a variety of procurement programs that offer different benefits, pricing structures, and product offerings, and we strive to support these needs by offering flexibility in how they can place orders.
If so, describe the measures you have in place to record and manage data accurately for public entities who purchase from multiple accounts/contracts ensuring accurate reporting of usage to Canoe?	<p>To ensure accurate reporting and data management for public entities that purchase from multiple accounts/contracts, including those under the Canoe contract, HD Supply has implemented a series of measures to record, track, and manage data accurately. These measures are designed to maintain transparency, ensure compliance, and provide detailed reports for public entities, ensuring usage under the Canoe contract is properly documented and reported.</p> <p>Custom pricing rules are built into the system for each contract, including the Canoe contract , so the system applies the appropriate pricing structure for every purchase, regardless of which contract or GPO is being used.</p> <p>To ensure data accuracy, HD Supply employs automated validation checks at various points in the order process. These checks verify the correct application of pricing and ensure that the correct pricing structure is applied based on the contract.</p> <p>HD Supply has established a comprehensive system for managing and reporting sales data accurately, ensuring that public entities purchasing from multiple accounts/contracts, including the Canoe contract, are fully compliant.</p>

Pricing Structure

Proponents should describe their pricing structure.

Question	Answer *
Describe the pricing structure used for plumbing items. Specifically, detail whether you follow a line item pricing, cost-plus model, a category discount model or any other pricing approach. Provide a breakdown of costs (materials, overhead, administration, freight,) and the typical markup applied at each distribution level. List any additional costs related to warranties, safety standards, or compliance certifications included in your pricing.	<p>Below is a detailed breakdown of the cost structure for plumbing items, including materials, overhead, administration, freight, and other factors. Additionally, we'll outline typical markup applied at each distribution level, as well as any costs related to warranties, safety standards, or compliance certifications.</p> <p>Materials Costs The base cost of the plumbing item as set by the manufacturer or supplier. This includes the raw material cost, manufacturing labor, and any overhead costs directly related to production.HD Supply may receive bulk purchasing discounts or special pricing agreements from manufacturers.</p> <p>Warehouse and Storage Costs These include expenses related to maintaining and operating HD Supply's distribution centers. This covers rent, utilities, insurance, inventory management systems, and labor costs associated with inventory handling and storage.</p> <p>Order Processing These costs are associated with order entry, customer service, invoicing, and any backend processes needed to complete the sale. HD Supply provides dedicated customer service, technical support, and account management, which contribute to administration costs.</p> <p>Freight The cost of shipping plumbing items from the manufacturer or supplier to HD Supply's distribution centers. This cost varies depending on the supplier's location and the mode of transportation. The cost of shipping items to the customer from HD Supply's warehouse. Freight charges may be added separately or included in the overall price, depending on the agreement with the customer</p> <p>Additional Markups At each stage of the distribution process, HD Supply applies a markup to account for the various costs and to ensure profitability. The typical markup varies depending on factors such as product category, volume, and market conditions. However, for plumbing items, the following general markup ranges apply:</p> <ul style="list-style-type: none">• Manufacturer to Distribution Center Markup- Typically ranges from **10% to 30%**. This markup accounts for basic warehouse and handling costs, including inbound freight and initial inventory storage.• Distribution Center to the Customer Markup - The markup applied at this level typically ranges from 20% to 50%, depending on the specific plumbing item, order volume, and the type of customer.• Volume Discounts - Larger orders or long-term customers may receive a reduced markup or special pricing agreements, which would lower the final price for high-volume purchases. <p>Additional costs related to warranties, safety standards, and compliance certifications are factored into the pricing of plumbing items, including those related to warranties, safety standards, and compliance certifications. This transparent pricing model allows customers to understand the costs associated with each product, while HD Supply remains committed to offering quality products at competitive prices.</p>
Quantify the pricing discount represented by the pricing proposal in this response. For example, if the pricing in your response represents a percentage discount from MSRP or list, state the percentage or percentage range.	All item pricing and quantity discounts are provided on the attached spreadsheet
Describe any cost-saving opportunities available to Canoe Members. This may include, but is not limited to, volume-based discounts, early payment discounts, seasonal markdowns etc.'	<p>Canoe Members have access to several cost-saving opportunities through HD Supply, including volume-based discounts, seasonal markdowns, and clearance items. These options are designed to provide Canoe Members with the most competitive pricing on a wide range of products while maximizing value.</p> <p>Volume-based discounts offer significant savings to customers who place large orders or commit to purchasing higher quantities of specific items. Seasonal markdowns are offered at specific times of the year, allowing customers to purchase products at reduced prices during off-peak seasons or when suppliers aim to clear out inventory for new models. Clearance items represent excess or discontinued inventory that HD Supply needs to sell off quickly. These items are often sold at a substantial discount to move inventory.</p> <ul style="list-style-type: none">• Additional Cost-Saving Opportunities• Promotions & Special Offers• Free Shipping on orders over \$250 (conditions apply) <p>By taking advantage of these cost-saving opportunities, Canoe Members can optimize their purchasing power, reduce overall project costs, and maximize the value of their purchases from HD Supply.</p> <p>Please see attached spreadsheets for any conditions or thresholds required to qualify for these discounts.</p>
Specify any conditions or thresholds required to qualify for these discounts, and detail how they would be applied to the final pricing Canoe Members will pay.	
Outline examples of any temporary or promotional pricing programs that may be offered throughout the year, and explain the criteria for participation.	<p>Seasonal markdowns are offered at specific times of the year, allowing customers to purchase products at reduced prices during off-peak seasons or when suppliers aim to clear out inventory for new models. These discounts typically occur at the end of a product's season or when manufacturers introduce new models or product lines.</p> <p>These can include:</p> <ul style="list-style-type: none">• End of year discounts on remaining inventory as new models arrive.• Discounts on seasonal products like plumbing fixtures, water heaters, etc., during peak shopping seasons.• Discounts on products that are no longer in high demand (e.g., air conditioning units in winter or heaters in summer). <p>By purchasing products during seasonal markdowns, Canoe Members can secure deep discounts on high-quality items. For example, buying a water heater or HVAC equipment in the off-season may result in significant savings.</p>

Shipping, Freight and pricing incentive

Line Item	Question	Reponse *
1	As applicable, present additional pricing details including any volume discounts, additional discounts or rebates or incentives, payment terms etc.	When it comes to pricing for Canoe Members, there are several additional pricing incentives available, including volume discounts, payment terms, and possible rebates or incentives. These elements are designed to provide further savings and flexibility for public entities and organizations purchasing through HD Supply. HD Supply typically offers flexible payment terms for public entities, allowing them to manage their cash flow more effectively. Net 30: This is a standard term where the full invoice amount is due within 30 days from the date of the invoice.
2	Explain your delivery model.	HD Supply utilizes a multi-carrier delivery model that ensures nationwide coverage across Canada, from coast to coast, including the northern territories. By working with a range of trusted national and regional delivery partners, we offer flexible, reliable, and efficient delivery solutions to meet the needs of our diverse customer base. The delivery options are tailored based on the location and nature of the order, with specific service options available for different regions.
3	Explain how your shipping and freight costs are calculated, as well as any related weight, geographical considerations and restrictions for remote or otherwise hard to access locations included in your offering. (you can attach support material in the document section of the procurement portal).	As part of our commitment to providing exceptional service and value to all Canoe Members, we offer the following freight policy for shipping: Orders Over \$250 Pre-Tax will enjoy freight-free shipping. This policy applies to orders placed through HD Supply, ensuring that members can place larger orders without worrying about additional shipping costs. Orders Under \$250 (Pre-Tax): For orders that fall under \$250 (pre-tax), a \$35 handling fee will be applied. This fee helps cover the cost of processing and shipping smaller orders. Some more remote locations or hard-to-reach areas (particularly in Canada's northern territories or rural regions) may be subject to additional freight charges based on the weight and distance of the shipment. These charges will be calculated at the time of order and will be communicated to the customer before finalizing the sale. By offering freight-free shipping on larger orders, as well as a clear handling fee for smaller orders, HD Supply ensures that Canoe Members receive competitive shipping rates while managing the logistical complexities of delivering to remote areas.
4	Outline how prices may be subject to change over the term of the agreement.	HD Supply is committed to offering consistent pricing throughout the entire term of the agreement with Canoe Members. The pricing structure provided in this proposal will remain unchanged for the duration of the contract, ensuring that members can rely on stable and predictable costs for all products and services covered by the agreement.

Administrative fee

Administrative Fee	Indicate percentage
In recognition of the valuable role Canoe plays in facilitating, managing, and promoting the Contract, the proponent should propose an administrative fee that not only reflects the worth of these services but also supports Canoe's mission in offering exceptional service to its members. It is understood that this fee must be greater than zero, as it represents Canoe's primary source of funding for the comprehensive services provided to members.	HD Supply is proposing the implementation of a 3% administrative fee that will be applied monthly on all invoiced purchases made by the Customer(s). This fee will be calculated on the total value of the products purchased, with a few specific exclusions: • Any product returns made by the Customer(s) will be excluded from the administrative fee calculation. • If an invoice remains unpaid after the due date, the administrative fee will not be charged for that specific invoice. • The fee will also not apply to purchases related to Installation Services, as these services are excluded from the scope of the administrative fee. This structure ensures that the administrative fee is only applied to qualifying purchases made by the Customer(s) and excludes specific scenarios that would not normally be considered as part of regular product purchases.

The Catalogue pricing must include:

- The Base cost list: A detailed breakdown of direct and indirect costs for each item (materials, labor, overhead) to establish the starting point for pricing.
- Standard markup schedule(s): A list showing the typical markup percentages applied to different items or categories, so you can see the baseline markup.
- Discounted price list: A list showing any applicable discounts or markdowns off the base price

The Current published MSRP: A list showing any applicable discounts or markdowns off the base price at the time of RFP closing.

Do not upload a proposal response, if you do Canoe will not evaluate it. Proposal responses must be entered into the specification questionnaires

Do not include generic promotional marketing materials, resumes, corporate brochures, unless specifically asked in the RFP. Canoe will not review any materials not explicitly requested.

3. must not be disclosed without prior written authorization from Canoe; and
4. must be returned by the proponent to Canoe immediately upon the request of Canoe.

1.5.2 Confidential Information of Proponent

A proponent should identify any information in its proposal or any accompanying documentation supplied in confidence for which confidentiality is to be maintained by Canoe. 1.6.3 Non-Binding Price Estimates

While the pricing information provided in proposals will be non-binding prior to the execution of a written agreement, such information will be assessed during the evaluation of the proposals and the ranking of the proponents. Any inaccurate, misleading, or incomplete information, including withdrawn or altered pricing, could adversely impact any such evaluation or ranking or the decision of Canoe to enter into an agreement for the Deliverables.

1.6.4 Cancellation

Canoe may cancel or amend the Solicitation process without liability at any time.

1.6.5 Competition Act

Under Canadian law, a Proponent's Proposal must be prepared without conspiracy, collusion, or fraud.
