Line Item	Question	Response *	
26	Sales force.	Rosenbauer sells our products through a dealer network with exclusive territory across North America. Currently that network consists of 27 dedicated dealerships. 24 of them in the United States and 3 that handle Canada. Rosenbauer has a network of direct staff that manage and back up those dealerships. Rosenbauer employs product specialists that work directly with our dealer network to showcase and promote individual product lines to them, those most prominent of them is our aerial devices. Due to their complexity, ARFF vehicles are sold by our company directly with no dealer involvement. Rosenbauer also sells to the Federal Government and that is also handled by an internal team.	*
27	Describe the network of Authorized Sellers who will deliver Solutions, including dealers, distributors, resellers, and other distribution methods.	Rosenbauer has a network of dealers that are all authorized to sell and service all products that we offer. All of our municipal sales are handled through the dealer network which currently consists of 27 dealerships. There is a map in the attachments that shows individual territory of each dealership.	*
28	Service force.	All service is provided on our entire product line locally by one of our dealers and back up with factory support from our service department. To assist our dealers in providing service, Rosenbauer has mobile service vehicles that are staffed in Florida, South Dakota, Nebraska, Minnesota and New York that are ready and available to travel to anywhere in North America to assist or lead service repair work. Rosenbauer uses a state of the art online tracking system to catalog and track all calls for warranty and service. The system is available to all service staff and all sales management staff 24-7. Rosenbauer has direct staff of 35 that are dedicated to our service department. Rosenbauer offers periodic EVT (Emergency Vehicle Technician) certification testing and also hosts 10 to 15 service seminars per year to keep our direct personnel and dealer service personal trained on the most current techniques for repairing emergency vehicles.	*
29	Describe the ordering process. If orders will be handled by distributors, dealers or others, explain the respective roles of the Proposer and others.	Once a customer has settled on the product they wish to purchase, an order is accepted by our local dealer. The customer has the option of signing a contract or purchase agreement directly with Rosenbauer, or in other cases will sign a contract or purchase agreement with our dealer/distributor. That information is sent in to the factory to ensure that all of the terms of the agreement are acceptable, accurate and complete. Rosenbauer takes on the responsibility of ensuring that all of the requirements for the contracted purchase are being met, whether those are from a cooperative purchasing contract or other source.	*
30	Describe in detail the process and procedure of your customer service program, if applicable. Include your response-time capabilities and commitments, as well as any incentives that help your providers meet your stated service goals or promises.	Rosenbauer has a robust in-house service team. We utilize an online system for managing all service and warranty requests. Our dedicated team works hand in hand with our dealer network to ensure timely responses for all requests. When requests are submitted to us, the end user or dealer service provider alerts us to the severity of the problem. There are varying degrees of problems with a fire truck. Is it something that is a nuisance and isn't keeping them from using the truck, or is it an issue that takes the truck out of service? If the truck is out of service, our team has an internal alarm that requires them to respond to the request within 2 hours. Our internal staff will coordinate with dealer service staff to ensure parts, expertise and whatever else they need is available to them as quickly as possible.	*
31	Describe your ability and willingness to provide your products and services to Sourcwell participating entities.	Rosenbauer currently utilizes the Sourcwell contract and has for 12 years. Most of our dealer network is very well versed in the ways to use it and how it works. We require our dealers to attend a refresher webinar at least every 6 months where we discuss best practices in offering the contract as well as review recent orders. Rosenbauer does not have any products in our offerings that are not available for purchase through the Sourcwell contract.	*
32	Describe your ability and willingness to provide your products and services to Sourcwell participating entities in Canada.	Everything that Rosenbauer has to offer through the US market is also available in Canada. We have been using the CANOE connection with great success since the inception of the group and are extremely encouraged with its growth in the last 3 years. We look at this as a great opportunity to grow our Canadian market share. We have 3 dealers that cover Canada and all of them are very well versed in Sourcwell/CANOE and will continue to grow this segment.	*
33	Identify any geographic areas of the United States or Canada that you will NOT be fully serving through the proposed agreement.	None.	*
34	Identify any account type of Participating Entity which will not have full access to your Solutions if awarded an agreement, and the reasoning for this.	None.	*

35	Define any specific requirements or restrictions that would apply to our participating entities in Hawaii and Alaska and in US Territories.	There would be no restrictions placed on customers in Hawaii, Alaska or the US Territories.	*
36	Will Proposer extend terms of any awarded master agreement to nonprofit entities?	Yes.	*

**Table 4: Marketing Plan (100 Points)**

Line Item	Question	Response *	
37	Describe your marketing strategy for promoting this opportunity. Upload representative samples of your marketing materials (if applicable) in the document upload section of your response.	Rosenbauer includes the Sourcewell and CONOE logos in several of our print ads. We utilize the most prominent fire industry magazines as well as their online versions. The information for the contract is prominently displayed on our website as well as our social media channels that include, Facebook, Twitter / X, Instagram and Tic Toc. We include Sourcewell / CONOE branding on communications that are sent to our dealer network monthly and semi-annually. We provide training to our dealer network at least annually at our in person dealer meeting. Sourcewell has provide in person, on site training for our dealers in this setting as well. The more we get this vial info in to the hands of our direct customer contacting sales force, the more successful we will be using the contract.	*
38	Describe your use of technology and digital data (e.g., social media, metadata usage) to enhance marketing effectiveness.	Rosenbauer is extremely active in web driven advertising and has a very large social media following. We utilize tracking data from online advertising through our partners in the industry. We regularly appear on Fire Apparatus, Fire Engineering and Fire House magazine online sites. As part of our advertising agreement with those entities, we require them to produce meta data that shows the effectiveness of those ads. We adjust our strategies regularly according to the data received. We also spend a large amount of our marketing dollars on Facebook, Twitter / X, Instagram and Tic Toc content. The engagement data that we receive from those platforms also influences our continued use of them.	*
39	In your view, what is Sourcewell's role in promoting agreements arising out of this RFP? How will you integrate a Sourcewell-awarded agreement into your sales process?	The role for Sourcewell can be summed up by "keep doing what you're doing". The continued marketing of the contract by Sourcewell as well as the member partners is making a massive impact on our industry. As little as 7 years ago, the vast majority of fire truck purchases were still being made as RFP's and singed individual contracts. Today, over 60% of fire trucks purchased in the US are utilizing one of the purchasing cooperative contracts that are available. We see this continuing to grow and we see Sourcewell as the driving force to make that happen. Our dealers are well versed in best practices for using the contract. They have easy access to key member of the Sourcewell team and are not afraid to contact them directly when they need help. We value our partnership with Sourcewell and look forward to continuing to build it.	*
40	Are your Solutions available through an e-procurement ordering process? If so, describe your e-procurement system and how governmental and educational customers have used it.	Rosenbauer does not have our own e-procurement system, but we participate in several third-party offerings. GSA E-buy, Texas Multiple Award, HGAC, and NASPO Value Point all have online ordering options that can be submitted to us and fulfilled. Our Federal Government entities utilize e-procurement sites from GSA and DLA for all their purchases. We offer all our product listings without exception to all these e-procurement sites.	*

Line Item	Question	Response *	
41	Describe any product, equipment, maintenance, or operator training programs that you offer to Sourcewell participating entities. Include details, such as whether training is standard or optional, who provides training, and any costs that apply.	Familiarization training is provided for end users of every piece of equipment we sell as standard. That training is part of the purchase contract and is included within the price of the truck. We offer additional onsite training for more complex equipment like our ARFF vehicles and our aerial products. This training can be ala carte chosen by a purchaser and will be priced to them as an option. Rosenbauer has a training department that sends people on location to handle familiarization as a "factory direct" service and we also hold quarterly classes to train our dealer representatives on best practices to handle this task locally.	*
42	Describe any technological advances that your proposed Solutions offer.	Rosenbauer has a long history of being the industry leader integrating technology into our products and services. The US fire service has a very tradition rich history and does not take easily to technology. Rosenbauer has pushed that comfort level continuously. We were the first to develop "smart" controls for our aerial products. These safe guards prevent operators from making movements that would jeopardize the safety of their crew. In our custom chassis products, we have integrated air bags, roll stability control and roll over protection that leads the way in the fire apparatus market.	*
43	Describe any "green" initiatives that relate to your company or to your Solutions, and include a list of the certifying agency for each.	Rosenbauer has continued to advance green initiatives with our products. We were the first in North America to deploy a completed electric fire engine. That product has been well received in the US and Canada. We have sold several of them utilizing the Sourcewell contract. In the past year we have also added a fully electric ARFF unit to our offerings. It is the only fully electric vehicle of its kind. The first one that was sold in the US went to Dallas Love Field and was sold on our existing Sourcewell contract.	*
44	Identify any third-party issued eco-labels, ratings or certifications that your company has received for the Solutions included in your Proposal related to energy efficiency or conservation, life-cycle design (cradle-to-cradle), or other green/sustainability factors.	Rosenbauer has not received any ratings, awards or certifications. We are working with the EPA, DOT and other Federal entities to expand classifications for electric vehicles.	*
45	What unique attributes does your company, your products, or your services offer to Sourcewell participating entities? What makes your proposed solutions unique in your industry as it applies to Sourcewell participating entities?	Rosenbauer has the widest array of products in the fire apparatus market. We offer something for every buyer in the market. We build everything from the smallest squad vehicles to 125 foot aerial devices and 4000 gallon ARFF trucks. No one in the industry can match our product line up. With continuous innovation we are always at the forefront of the apparatus industry and can bring new concepts and products to market faster than any of our competitors. We have a proven track record with Sourcewell, having been on contract for 12 years. We are big supporters of cooperative purchasing, and we truly believe this is quickly becoming the standard practice for purchasing.	*
46	Describe how your solutions meet United States fire related standards, such as NFPA, for the equipment and products offered in your proposal, including applicable federal and state requirements.	All our solutions include third party testing to ensure compliance with NFPA 1900, SMVSS and DOT regulations. We have Underwriters Laboratories (UL) on site every day of the week to test the vehicle we produce.	
47	Describe how your solutions meet Canadian fire related standards such as NFPA, and CAN/ULC S515 for the equipment and products offered in your proposal, including applicable federal and provincial requirements.	All our solutions include third party testing to ensure compliance with NFPA 1900, CMVSS and ULC regulations. We have Underwriters Laboratories (UL) on site every day of the week to test the vehicle we produce.	
48	Describe available service and repair options for the equipment and products offered in your proposal and how the process works with those servicing the equipment.	Rosenbauer has a vast network of service and repair facilities that our customers have access to. We have a fleet of mobile service vehicles that can travel directly to a purchaser location. We have 27 dealers across the US and Canada that also provide service. Each of those dealers have at least 1 service center location and many of them have multiple locations so that we can ensure that our customers have after the sale service and support no matter where they are located. A customer has to simply call their local dealership or Rosenbauer directly to access that service.

If applicable, provide a SKU for each item in your proposal. Upload your pricing materials (if applicable) in the document upload section of your response.	Rosenbauer will utilize a line-item price model for our offerings on the Sourcewell contract. Each specific model on contract will have an associated MSRP. Sourcewell members will receive a 15% discount off the calculated MSRP. Our detailed pricing document shows all the line items associated with the product offering. The customer can choose a wide variety of options to enhance the vehicle they wish to purchase. In our master pricing document, there are several pages dedicated to line-item pricing of those options. Please see the documents section for specifics on both our detailed pricing document as well as the overview /summary document.	*
63	Quantify the pricing discount represented by the pricing proposal in this response. For example, if the pricing in your response represents a percentage discount from MSRP or list, state the percentage or percentage range.	Rosenbauer is proposing a 15% discount from MSRP.	*
64	Describe any quantity or volume discounts or rebate programs that you offer.	Rosenbauer reviews volume discounts on a case-by-case basis. We do not have a standard discount or rebate associated with multiple unit orders.	*
65	Propose a method of facilitating "sourced" products or related services, which may be referred to as "open market" items or "non-contracted items". For example, you may supply such items "at cost" or "at cost plus a percentage," or you may supply a quote for each such request.	We review "open market" items for relevance and applicable use. If they can be incorporated in to our product they are typically purchase and provided to the customer at cost.	*
66	Identify any element of the total cost of acquisition that is NOT included in the pricing submitted with your response. This includes all additional charges associated with a purchase that are not directly identified as freight or shipping charges. For example, list costs for items like pre-delivery inspection, installation, set up, mandatory training, or initial inspection. Identify any parties that impose such costs and their relationship to the Proposer.	The only fees that are not captured by our offerings are local or state taxes. Most areas of North America treat fire truck purchases as tax exempt but there are areas /states where they require sales tax. In those instances, taxes are calculated and paid by the department when they receive their vehicle. There are no other charges will apply to the purchase of a vehicle from Rosenbauer.	*
67	If freight, delivery, or shipping is an additional cost to the Sourcewell participating entity, describe in detail the complete freight, shipping, and delivery program.	Delivery of the truck is included with purchase.	*
68	Specifically describe freight, shipping, and delivery terms or programs available for Alaska, Hawaii, Canada, or any offshore delivery.	Rosenbauer routinely delivers vehicles to South and Central America, the Middle East, Hawaii, Canada and Alaska. We have a network of shippers that we utilize to ensure that we can safely, securely and most importantly, timely deliver everything we sell.	*
69	Describe any unique distribution and/or delivery methods or options offered in your proposal.	Rosenbauer will handle delivery of the vehicle for any location that purchases from us. We can ship ocean freight to anywhere in the world, or simply drive the vehicle to the end users fire station. Each sale will include delivery.	*
70	Specifically describe any self-audit process or program that you plan to employ to verify compliance with your proposed agreement with Sourcewell. This process includes ensuring that Sourcewell participating entities obtain the proper pricing.	Every sales opportunity that will utilize the Sourcewell contract will go through a verification process. We will ensure that the vehicle quoted to the end user is below the ceiling price established in our detailed pricing document. Only after this review has completed will it proceed through our new order process.	*
71	If you are awarded an agreement, provide a few examples of internal metrics that will be tracked to measure whether you are having success with the agreement.	All incoming orders are tracked for origin. Were they through a traditional RFP process or did they utilize one of our cooperative purchasing contracts? We evaluate that information monthly and cross-check it with our dealer network. This method gives us data to provide extra training to dealers that may be underutilizing contract opportunities. It is also a great barometer to show our executive team and demonstrate the value of our cooperative contracts.	*
72	Provide a proposed Administration Fee payable to Sourcewell. The Fee is in consideration for the support and services provided by Sourcewell. The propose an Administrative Fee will be payable to Sourcewell on all completed transactions to Participating Entities utilizing this Agreement. The Administrative Fee will be calculated as a stated percentage, or flat fee as may be applicable, of all completed transactions utilizing this Master Agreement within the preceding Reporting Period defined in the agreement.	We are proposing a \$2,000 administrative fee per unit sold.	*

74	Provide a detailed description of all the Solutions offered, including used Solutions if applicable, offered in the proposal.	Rosenbauer builds a complete, customized fire apparatus. We have several different materials that we can build bodies from. We routinely build from galvanneal steel, stainless steel, 1/8" aluminum, 3/16" aluminum, extruded aluminum and stainless steel. We have straight stick aerials available in sizes ranging from 60' to 125'. We have aerial platform products from 85' to 104' and we are the only US manufacturer that builds an articulated aerial platform. We offer tanker/tender products with water tanks as large as 5000 gallons. We build ARFF vehicles starting with smaller C2 and C3 units to our Panther in 4x4, 6x6 and HRET configurations. All these products can be completely customized to meet our customers' needs. Every model along with all the option content for the specific type of vehicle is listed in our pricing detail document. A summary of that detail can be found in our pricing summary document.
75	Within this RFP category there may be subcategories of solutions. List subcategory titles that best describe your products and services.	Along with vehicles stated above, Rosenbauer also offers a complete line of specialty vehicles for the fire and police market. We also offer a vast array of builds for the wildland / urban interface market.
76	Describe available remount or refurbishing services included within your proposal, the pricing method for such services, and any related order processes.	Rosenbauer does work in the remount and refurbishing area as well. When we approach a project, they price it based on the parts needed to complete the task. A detailed specification is developed that utilizes parts that are listed in our pricing detail document.
77	Describe in detail warranties offered and how they will be administered, including if they cover all products, parts, labor, technician travel, and geographic regions covered.	Rosenbauer offers a wide range of warranties. Our base offering is 1 year bumper to bumper coverage. We have options to purchase additional coverage. We have extended terms on several items. For example: paint, lettering, pumps, plumbing, body structure, cab structure, aerial devise and water tanks. Each of those warranty items has a differing term at the time of purchase. A department has the option to select warranty coverage that fits their needs. We have attached several examples of our warranty documents in the uploads section of this application.
78	Will you cover warranty service for items made by other manufacturers that are part of your proposal, or are these warranty issues typically passed on to the original equipment manufacturer?	Rosenbauer offers a true bumper to bumper warranty on everything we sell. A fire truck is made up of hundreds of parts that come from manufactures all over the world. In our warranty, Rosenbauer takes the ownership of fixing or replacing all parts of the vehicle, regardless of origin, during the warranty period.
79	Describe any service contract options or extended warranties being offered with your proposal.	Rosenbauer has several options for service contracts and extended warranty. Documents to support that have been uploaded where applicable
